DETAILED ACTION

Response to Arguments

Applicant's arguments, see Remarks, filed 17 January 2005, with respect to claims 1-5, 8, 11, 18, and 20 have been fully considered and are persuasive. The rejections of these claims have been withdrawn.

Applicant's arguments with respect to claims 17 and 19 have been considered but are most in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 17 is rejected under 35 U.S.C. 102(b) as being anticipated by Jalics.

As per claim 17, Jalics discloses a gas burner for a heating system having a burner and a flue, wherein a sensor 98 monitors the flame to indicate the presence or absence of a flame, thereby indicating whether the flue is blocked (column 2, lines 7-10, 44-48; column 7, lines 40-44; etc.)

Claim Rejections - 35 USC § 103

Application/Control Number: 10/698,882

Art Unit: 3744

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

- 1. Determining the scope and contents of the prior art.
- 2. Ascertaining the differences between the prior art and the claims at issue.
- 3. Resolving the level of ordinary skill in the pertinent art.
- 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claim 19 is rejected under 35 U.S.C. 103(a) as being unpatentable over Jalics.

As per claim 19, Jalics teaches a burner disposed in a chamber having a flue, a flame sensor monitoring the flame, and a controller determining from the sensor output if the flue is blocked (again, see column 7, lines 40-44). Jalics does not teach the sensor being an optical sensor, although it does teach that various types of sensors might be suitable (column 6, lines 51-53). Official notice is taken that optical flame sensors are common and well-known in the art (see for example Servidio, column 2, lines 30-36) of oil burner controls. It would have been obvious to one of ordinary skill in the art at the time the invention was made to apply an optical sensor within the system of Jalics as an alternative means of sensing the flame.

Conclusion

Art Unit: 3744

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marc E. Norman whose telephone number is 571-272-4812. The examiner can normally be reached on Mon.-Fri., 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Denise Esquivel can be reached on 571-272-4808. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
